

Photomontage for council approval

Note that photo editing work to the neighbouring building was required in this instance where the tree has been removed and the neighbouring building has to be created in its place.
The drive has also been relocated.

Also see our website for more information about photomontages for council submission.

Photomontages

This project required a photomontage for a council application.

The client also wanted a marketing view of this project so it was decided a new image be created using the previous photomontage as a base from which to create it from.

Below is another similar example where a marketing view would not be suitable as a photomontage submission to council, so additional views were required.
